GEORGE D GREEN ART INSTITUTE

TROMPE L'OEIL ILLUSION

The George D. Green Art Institute was started in order to carry forward George's vision to encourage young people to be at their creative best. Everyone at the GDGAI is dedicated to making sure that the next generation of artists will have an opportunity to experience art, and the creation of art, on a first-hand basis.

— Educational Outreach —

The Institute has a robust program of educational workshops and in-person seminars with artists. Combined with traveling art exhibitions, young people are able to take part in an engaging, interactive experience.

Interested schools and public groups can apply to have an exhibition or an artist workshop come to their area. Please contact us at info@georgedgreenartinstitute.org to explore this opportunity.

— Exhibits —

Through the Institute's exhibits, local community residents have had an unprecedented opportunity to view art at its highest level. Many of the individual works are from private collections or galleries and have never before been shown in public.

The extensive and evolving collection offers a unique opportunity to experience moments of creative discovery.
